

Airtrack Pro1 10M

Airtrack

The Airtrack is a completely flat inflatable mat. The mat can be inflated by means of the supplied blower with which you can inflate the mat to any desired pressure. The mat comes with a pressure gauge. The pressure gauge measures exactly the pressure inside the track, a perfect pressure is important for the proper use of the mat. The pressure gauge is connected to the second valve of the track when the mat is inflated.

Flexibility

The Airtrack midi is a flat and completely airtight mat with the height of 20 cm. The mat is lightweight and therefore easy to transport and move. By adjusting the pressure in the mat through the valve, the hardness of the mat can be determined.

Expandable

The Airtrack has a length of no less than 10 metres and a width of 2 metres. If more space or length is required, the mats can be linked by means of the TrackConnect, which connects the mats with Velcro.

Customizations

Besides the standard Airtracks that are in stock, it is also possible to make an Airtrack in your own desired colors. Including imprint. This can be interesting for sponsors. We can deliver these in about 4 weeks. Ask us for the possibilities!

Inflated product

Length	33ft
