

Video Screens 50

Attention movie and sports fans! What could be more fun than watching your favorite movie on the big screen? Or how about a football match: cheering with your friends when your favorite football team scores. Then you don't want someone to miss that beautiful score because someone is in front of the TV. Switch on the blower and in no time there will be an inflatable movie screen of 10 or 16 feet. The blower is not on all the time, because this inflatable is airtight. No creases, no cloth blowing away. No, a large, beautiful, and stable Video Screen that is solid like a rock. Turn on your projector and watch!

Video Screens

A Video Screen of 5 meters and larger; ideal for small-scale or huge events. When you give a presentation or want to show your company movie, this will naturally come across better on a large screen. The advantage of an inflatable movie screen is that you can install it at any location and are therefore no longer dependent on a meeting room or lecture hall. Are you holding a meeting for large groups, organizing a festival or outdoor movie theater? Then there are the Screens 3000 Screens of up to 43 feet in width. This way you don't have to worry that someone will miss something from the presentation or film. Turn on the blower and in no time there will be an inflatable movie screen 16 feet or larger. The blower is not on all the time, because this inflatable is airtight. No creases, no cloth blowing away. No, a large, beautiful and stable Video Screen that stands like a house. Turn on the beamer and watch!
